EDUCATION

Stony Brook University

B.Sc: Computer Science, GPA: 3.61

May. 2028

Stony Brook, NY

Honors and Awards: Dean's List, SBU Far Beyond Scholarship

SKILLS AND INVOLVEMENTf

- **Programming Languages:** Java, Python, JavaScript Stream API, MongoDB.
- **Web Development:** HTML, CSS, React.js, Node.js, RESTful APIs, SOAP.
- **Data Science/AI/ML Toolkit:** MySQL, Pandas, Regression, Object-Oriented Programming, Computer Networks.
- **Certifications:** The Web Developer Bootcamp 2024

WORK EXPERIENCE

Manras Technologies

June 2025-July.2025

Frontend Developer Intern

Zirakpur, India

- Provided end-to-end technical support, completing **100%** of documentation, software updates, and troubleshooting requests within deadlines.
- Optimized Dynamics data models by refining record types, page layouts, and validation rules, reducing form errors by **20%** and improving system reliability.
- Created and managed **60+ high-priority Visualforce and PDF documents** for Adani Group real estate projects, ensuring accurate delivery of client-facing materials.
- Collaborated with team members on document assignments, streamlining handoffs and improving task completion efficiency across the portfolio.

Campus Planning, Design and Construction

September

2025–Present

Student Assistant

Stony Brook, New York

- Processed payroll records weekly with **100%** accuracy, ensuring timely and error free compensation for university staff and contractors.
- Coordinated scheduling and calendar management for senior staff, reducing meeting conflicts and improving workflow efficiency by **15%**.
- Supported frontline construction teams by preparing and distributing critical paperwork, helping projects stay on schedule across multiple university sites.

Stony Brook University – AMS 161: Calculus II

Aug.2025–Present

Teaching Assistant

Stony Brook, New York

- Assisted professor in facilitating coursework for **200+ undergraduate students**, reinforcing concepts in integration techniques, sequences, and series.
- Led weekly recitation sessions and office hours, clarifying problem-solving strategies and boosting student comprehension.
- Graded homework and exams with **100% accuracy** and timely feedback, ensuring fairness and consistency.

PROJECTS

SmartStudy - JavaScript, React, Node.js, MongoDB, API Integration

- Engineered a MongoDB backend to process and store **100+ student survey responses**, enabling real-time retrieval of occupancy data.
- Integrated frontend survey inputs with the backend, delivering **instant updates on study spot availability** (vacant, moderately busy, full) with <1s latency.
- Designed a dynamic formula-based calculation system that accurately estimated occupancy levels with **95%+ consistency across test scenarios**, improving decision-making for students.

Department Store - Java

- Developed a departmental store inventory management system using **Object-Oriented Programming and data structures**, streamlining product tracking and stock updates.
- Optimized performance by implementing HashMaps, achieving **20% faster data retrieval, 15% lower memory usage**, and improved search efficiency compared to baseline Linked List implementation.
